## **ON-SITE CONSTRUCTION WORK RECOMMENCES AT GINGIN**

M8 Sustainable Limited (ASX:M8S) (“**M8S**” or “**the Company**”) is pleased to announce that major construction work at the Company’s fully permitted Gingin Landfill Facility (“**Gingin**”) has recommenced. Gingin has a licensed capacity of 150,000 tonnes per annum.

Over the past six months on-site activities at Gingin have been limited, as the critical cell liners were ordered, manufactured and tested. Following delivery of the liners, a mandatory 100-day testing period was required to ensure that the liners complied with stringent specifications set by the Department of Water and Environmental Regulation (DWER). That independent testing has now been successfully completed.

On-site activity during the recent period largely centred on establishing an internal road system.

The Company is now focused on completing key construction activities which include installation of liners and other site infrastructure as M8S works towards a completion of construction date by November 2021.

This announcement is authorised for market release by the board of directors
