ABOUT M8 SUSTAINABLE

M8 Sustainable is a key player in the fast-growing WA waste management sector, with a strategic focus on the downstream sectors of processing and disposal.

M8 operates a metropolitan construction and demolition waste processing facility in Maddington – while its key growth asset is a major new bioreactor waste management facility at Gingin in Perth's north, currently under construction.

The Company's integrated business model generates revenue from waste processing and the recovery and sale of waste-derived products, while a considerable opportunity exists for the Gingin facility to host a waste-to-energy bioreactor facility.
